WORK EXPERIENCE

OBDURE INFOTECH Noida, India Software Engineer Jun 2022 – July 2024

- Built and maintained scalable web applications using React, Node.js, and Express.
- Designed and implemented RESTful APIs, enabling seamless data exchange between front-end and back-end systems.
- Managed and optimized MongoDB and SQL databases to ensure efficient data storage and retrieval.
- Implemented unit and integration testing using tools like Jest and Mocha to ensure high-quality, bug-free code.

PROJECT WORK EXPERIENCE

Iristel

- Maintained and enhanced a Canadian telecommunications company's website by creating and integrating new APIs, optimizing both front-end and back-end functionality.
- Improved user experience and added new features to support a range of services including phone numbers and internet solutions.
- Continuously monitored site performance and user feedback to iteratively improve functionality and user experience.

Funding Possibilities

- Developed and led the creation of a comprehensive platform connecting investors and startups, facilitating interactions and information sharing through three distinct interfaces: Investor Platform, Startup Platform, and Admin Panel.
- Led a team of developers, overseeing project progress, code quality, and adherence to best practices.
- Developed server-side logic and APIs with Express.js, ensuring efficient data handling and integration with PostgreSQL via Sequelize ORM.
- Worked closely with designers to create intuitive and responsive UI/UX, enhancing user interaction and satisfaction.
